By default the Centre Navigation key shortcuts are set as below:
UP: Audio Player
Down: Shortcuts
Right: Calendar
Left : Write message
You can change the Navigational keys shortcuts by entering Menu > Settings>Phone settings>Dedicated key

General Information

Thank you for selecting our mobile phone. This user guide will provide you with the general information and operation instructions.
The package includes a chargeable battery, a charger and other accessories. Please refer to the Accessory section for details.
Note:

- Use only accessories approved by the phone manufacturer to ensure safety. Failing to comply with this will violate the terms and conditions of the warranty.
- If the contents and displays described in this user guide do not match the actual operation of the phone set, please use the display of the actual phone set. We reserved the rights to change the mechanisms of the phone without notice.
- This user guide is subject to change without notice.

1.Security

Emergency call

In any country, you can dial 112 (or other emergency call number) for emergency help.
Note:

- Based on the nature of cellular networking, the success of the emergency call cannot be guaranteed.

For your safety

- Switch off the phone in hospitals and aircraft. Obey any restrictions. Wireless devices can affect the medical treatment and cause interference in aircraft.
- Some medical devices such as hearing aids and pacemaker may be sensitive to external radio frequency emissions. Consult the device manufacturers or your doctor before using the phone around the medical devices.
- Pay special attention to the ring tone volume and vibration settings if you have a heart problem.
- In areas with potentially explosive atmosphere, such as gas stations, fuel or chemical transfer or storage facilities, obey all signs and instructions.
- You phone will emit radio frequency even in the standby mode. Turn off you phone when so instructed.

- Always obey all the local laws and regulations. Do not use your phone while driving. Use Hands-free operation, if available, and give full attention to driving and to the road. Pull off the road and park before making or answering a call if driving conditions so require.
- If your phone is lost or stolen, notify your service provider immediately to stop the SIM card from being used.
- When you contact your service provider, they will need your IMEI number. It is printed on the back of your phone set (you can find it when you remove your battery), or call *#06# to look up your IMEI number. Copy this number and save it for future need.
- To prevent your phone from misuse, lock your SIM card or phone, and change passwords when necessary.
- Do not remove the battery without turning off the phone. Failure to follow this instruction may result in data lost.
- When you leave your vehicle, take the phone with you or place it in the glove compartment to avoid theft.
- Keep the phone, battery or charger out of reach of children.

Notices for your phone use

- Do not keep the phone near magnetic cards and other object with magnetism. The phone's magnetism may clear the information stored on floppy disk, pre-paid phone card and credit card.
- Use the phone near land phone, television, radio and office automatic devices may cause interference and affect the function of the mobile phone.
- Keep the phone dry, all kinds of liquid can erode the electronic circuit.
- Keep the phone away from extreme temperatures.
- Keep the phone away from hot places where the temperature may exceed 60°C, such as the dash board, windowsill, near fire or a lighted cigarette.
- Do not paint the phone.
- Do not drop the phone or violently crush or shake the phone.
- Do not disassemble or modify your phone. This can damage the phone, cause leakage and break the internal circuit.
- Use only damp cloth or non-static cloth to clean your phone. Do not use alcohol, thinner, benzene or other chemicals or abrasive cleaner to clean your phone.
- The phone will become warm under normal use and while in battery charging.
- Do not leave the phone with battery uninstalled or with the battery empty for a long period of time. This may cause data loss.
- The metal parts of the phone may irritate your skin depending on your health condition.
- Do not put the phone in the back pocket. Sitting on it may damage the phone. Do not put the phone on the bottom of a bag. You may crush it.
- When the vibrate mode is on, place the phone carefully to avoid it being dropped from a height or being moved to a heat source due to the vibrating.

Notice for batteries use

- Do not disassemble or modify your batteries, otherwise it can cause leakage, over heat, fire or explosion.
- Disposing battery in a fire can cause fire or explosion. Old batteries should be returned to your dealer or be disposed according to local regulations. Do not dispose the battery as household waste.
- Do not short the circuit of the battery with wires, needles or other metal objects, or store the batteries with necklace or other metal objects, otherwise it can cause leakage, over heat, fire or explosion.
- There is a risk of blinding if the liquid of the batteries gets into your eyes. In case of this, do not rub your eyes, you should rinse your eyes well with fresh water and go to the hospital immediately.
- If the leaked liquid of the battery touches the skin, it can burn the skin. Please wash your skin with fresh water and go to the hospital immediately.
- Never put the battery in your month. The liquid of the battery can be toxic.
- Stop using the battery when you find it became hotter, and change color and shape abnormally during use, charging or storing.
- Keep the batteries dry.
- Do not use or store batteries near fire, heater and other place with high temperature, otherwise it can result in leakage, over heat, fire or explosion. Store the battery in a cool and ventilated place without direct sun light.
- Do not charge the battery for more than 24 hours.
- The battery can be charged and discharged for hundreds of times but it will eventually wear out. The battery life is shortened with each charging.
- When replacing the battery, use only the batteries approved by the phone manufacturer. Damage resulting from using un-authorized batteries will not be covered by warranty.

Traffic safety

- Do not use your phone when driving a vehicle. Give full attention to driving and to the road. Provided there is an emergency, stop your vehicle in a safe place and then use your phone. Please obey all the local traffic laws and regulations.
- Normally the electronic systems in the vehicle should not be affected by the RF (Radio Frequency) signals from your wireless phone. However if you suspect any damage is resulting from the RF of your phone, contact your car dealer. Stop using your phone in the car until a qualified technician clears the problem.
- Turn off your phone when in the gas station or any place where using wireless equipment is prohibited. Do not place or transport your phone with inflammables or explosives, the internal sparkle may cause fire.

Airplane safety

- Power off your phone before boarding, the use of a wireless phone in an airplane will be dangerous to the operation of the airplane and disrupt the wireless telephone network and maybe illegal. Failure to observe these instructions may lead to law suit or denial of GSM cellular network service to the offender.
- Should there be an emergency situation, contact crew member.

Phone Registration

In order to register the details of the customer, the software embedded in the phone has the facility to send a SMS automatically to MIRC Electronics Ltd upon insertion of the SIM card. It is in the interest of the user to register its details with the company for any future services, as may be needed. The user agrees to pay the SMS charges in respect of the automated SMS sent to the company upon insertion of the SIM card.

Description of keypad keys

2. Getting Started

2.1. Batteries

The battery is included in the package. It is not fully charged out of factory but it may still be able to power on your phone. Please completely use up the power of the battery and then charge it for at least 12 hours with your phone turned off. You battery will reach its optimal state after three cycles of charge and discharge.

2.1.1. Installing and uninstalling the battery

To install the battery, remove the back cover from the phone by using the slot provided. Align the golden contacts of the battery to the contacts in the phone, and then gently snap down the battery into place. Re-assemble the back cover.
To uninstall the battery, flip the battery out from the bottom of the battery.

2.1.2. Charging the battery

Plug the charger into the socket on the side of your phone. Connect the charger to an AC wall socket. The blinking of the battery level icon indicates the battery is being charged. When the blinking stops, it indicates the charging is finished
During charging, the phone and charger will feel warm to the touch. This is normal.

Warning:

- The operating ambient temperature of the charger is 0°C-50°C. Do not use it when the temperature exceeds this limit.
- Use only chargers approved by the phone manufacturer to ensure safety. Failing to comply with this will violate the terms and conditions of the warranty.

2.1.3. Using the battery

The waiting time and calling time capacities specified by the phone manufacturer are obtained under the ideal operating environment. The actual values will vary with the network condition, operating environment and operation method.
Please comply with the local regulations of disposing the battery (such as recycling). Do not dispose it as household waste.

2.1.4. Battery level indicator

When the phone is on, the battery level indicator is located at the upper right corner of the screen.

2.2. Connecting to the Network

2.2.1. SIM card

Please insert available Subscriber Identity Module (SIM) card into your phone before using it. SIM card is supplied by your network carrier.
All the information related to network connection is recorded on the SIM card, so are the contact information such as names, phone numbers and SMS that you set to store on the SIM. You can take out the SIM card from the phone and insert it into another GSM phone to use it. Most new phones will recognize the SIM card automatically.
Do not touch the golden contacts of the SIM card and place it away from electricity and magnetism to avoid damage. You will not be able to use the phone if the SIM card is damaged.

Note:

- Before inserting and taking out the SIM card, always make sure that the phone is switched off and disconnected from any external power source; otherwise both the phone and the SIM card may be damaged.

2.2.2. Installing and uninstalling the SIM card

The SIM card usually comes attached to a special card. The metal contacts of SIM card is easily damaged by scratching, so take it out carefully before assembling it into the phone.
Switch off the phone; remove the back cover, battery and other external power source. Fit the SIM card into the SIM card slot. Align the angled corner of the SIM card with the slot. Slide in the SIM card, make sure it is in place, install the battery, and restore the back cover.
Likewise, to remove the SIM card, switch off the phone, remove the battery and then take out the SIM card.

2.2.3. Unlock the SIM card

PIN code
Your Personal Identification Number (PIN) code protects the SIM card against unauthorized use. Your PIN code is usually supplied with the SIM card. If this security function is enabled, you need to enter the PIN code every time you turn on the phone. You can also disable this function.
To unlock the SIM card, press and hold the power button to turn on the phone. Enter the PIN code. After three consecutive incorrect PIN code entries, the code is blocked, and you need the PUK code to unblock it.
PUK code
This code is required to change a locked PIN code. If the code is not supplied with the SIM card, contact your service provider. After ten consecutive incorrect PUK code entries, the SIM card cannot be used any more. Please contact your service provider to buy a new SIM card. You cannot edit PUK code. If it is lost, Please contact your service provider.

2.2.4. Connecting to the network

After the SIM card is unlocked, you phone will automatically search for the registered network or other local available network. Once connected, the name of the network carrier will appear on the top of the screen.
You phone is now in Standby mode, ready for making and receiving calls.

2.3. Text Input Method

This phone provides various text input methods that allow you to use less key strokes to input and search for text:

- ABC/abc input method
- Hindu input method
- Numbers 123 input

3. Menu

You can press the OK key or the left soft key to enter the main menu.

Setup of Alarm Clock
Set up the alarm clock with the following options:

- Set the alarm clock status as opened or closed.
- Set the alarm clock time.
- Set the repeat, once, Everyday, Days.
- Select alarm tone.
- Select the snooze time.
- Set the Alert type.

After setting please save the change.

3.9.4. World clock

You can view the current local time of various countries.

3.10. Services

3.10.1. Internet service

➢ **Homepage**

Enter the homepage; it will connect with default page automatically.

➢ **Bookmarks**

You can select, add bookmark, enter the bookmark's address, name and save it. Press left soft key to access options:

- **Add bookmark:** Add new bookmark.
- M**emory status:** Check storage status

➢ **Search or input URL**

Enter the website. After confirmation you can connect with this WAP page.

➢ **Recent pages**

View Recently visited pages.

➢ **Settings**

- **Homepage:** Modify the default Home Address.
- **Data account:** You can select SIM1, SIM2.
- **Browser options:** Clear cache, clear cookies and clear authentication info.
- **Preferences:** You can set according to their own preferences timeout, show pictures, cache, etc.

3.10.2. STK

SIM Card support is required in this service.

3.11. File manager

The File Manager lists the all the files stored in your memory card.

3.12. Tools

3.12.1. Calculator

You can conduct the basic arithmetic operations with this function.

- Input the first number.
- Press one of directional keys to select the arithmetic operation sign.

Input the second number.

4. Appendix

4.1. FAQ

The phone cannot be turned on

When the battery is very low, the phone may not be turned on properly. Please charge the battery.

Cannot make certain calls

Check if Call Barring is set. If it is set, you may not be able to make calls or only certain calls are allowed.

My call is picked up by another phone

Check if call divert is set. If it is set, your incoming calls may be diverted to other numbers or devices.

4.2. Error Message

Please insert SIM card

Make sure you have inserted SIM card. If you have installed it but it cannot be detected, please try clean the golden contacts of the SIM card by using a dry cloth. If it still is not working, please contact your network carrier.

No service

If you are in an area not covered by your network, or if a physical obstacle is present, such as in an enclosed area, the message "No service" will be displayed on your Standby screen and you will not be able to make or receive calls. You can try move closer to a window for better reception.

For emergency only

When you are outside your network but inside other network, you can only make emergency call.

No Valid SIM card

Your SIM card is locked or it has an error. Please insert the right SIM card or contact your service provider.

Enter PUK code

After three consecutive incorrect PIN code entries, the code is blocked, and you need the PUK code to unblock it. Contact your service provider. After seven consecutive incorrect PUK code entries, the SIM card cannot be used any more. Please contact your service provider to buy a new SIM card.

4.3. Care and maintenance

Thank you for choosing our phone. Should you encounter any problem with the phone, please contact our dealer or qualified service provider.

Your phone is a finely designed and crafted product. Please use it with care. The following instructions will help you comply with the terms of the warranty and enjoy this product for many years:

- Keep the phone and all its parts and accessories out of the reach of children.
- Keep the phone dry, all kinds of liquid will erode the electronic circuit.
- Do not use or store the phone in a dusty place to avoid damaging the removable parts.
- Keep the phone away from hot places, high temperature can shorten the life of electronic device, warp or melt certain plastic and damage batteries.
- Do not attempt to open or disassemble the phone, non-expert handling may damage it.
- Do not drop, crush or shake the phone to avoid damaging the internal circuit board.
- Do not use harsh chemicals, cleaning solvents or strong detergent to clean the phone.
- Do not paint the phone or the paint may obstruct the removable parts and affect operation.
- Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the phone Do not hold the external antenna when the phone is in use. Holding the external antenna affects call quality and may cause the phone to operate at a higher power level than needed. In addition, use of unauthorized antennas may result in non-compliance with the local regulatory requirements in your country.

The above instructions apply to your phone, battery, charger and other accessories. If any of them does not work properly, please send it to a qualified service provider.

5. Accessory list

1 each of handset , battery , charger , headset , user manual , data cable

Specific Absorption Rate (SAR) certification information

Your mobile phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the limits for exposure to radio frequency (RF) energy recommended by international guidelines and the guidelines issued by Department of Telecommunication (DoT). These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The limits include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

The radio wave exposure guidelines use a unit of measurement known as the Specific Absorption Rate (SAR). The SAR limit for mobile devices is 1.6 W/kg. Tests for SAR are conducted using standard operating position with the device transmitting at its highest certified power level in all tested frequency bands.

It is declared that the SAR Value of this Mobile Handset is certified by ILAC and is in conformity with the SAR values of 1.6 W/kg as recommended in the guidelines issued by DOT
The highest SAR values under the ICNIRP guidelines for this device model are:
Maximum SAR for this model and conditions under which it was recorded

Head SAR: 0.859W/Kg

During use, the actual values for this device are usually well below the values stated above. This is because, for purpose of system efficiency and to minimize interference on the network, the operating power of your mobile device is automatically decreased when full power output of the device, the lower SAR value.
If people are concerned and want to reduce their exposure, they could use a hands-free accessory to keep the wireless device away from the body during use, or reduce the amount of time spent using the device.

Date of Purchase: _____

Date of Expiry of Warranty: _____

Please paste the IMEI sticker in the space provided below,the Warranty of your handset is based on the same, so keep the form in a safe place

MIRC ELECTRONICS LTD provides this Limited Warranty to person who has purchased the ONIDA mobile phone andoriginal accessory delivered with your mobile phone.
The warranty period for the transceiver for 1 year, battery & charger for 6 months is from the date of purchase of the product.
The warranty does not cover external housing and cosmetic parts.
MIRC ELECTRONICS LTD warrants to you that during the warranty period MIRC ELECTRONICS LTD or a MIRC ELECTRONICS LTD authorized service network will repair or replace, at MIRC ELECTRONICS LTD option, any defective product, or parts thereof, with new or factory rebuilt replacement items, and return the product to the consumer in working condition. No charge will be made to the consumer for either parts or labour in repairing or replacing the product. All replaced boards or equipment shall become property of MIRC ELECTRONICS LTD.
The warranty in respect of a repaired or replaced product/part shall extend for the remaining warranty period of the repaired product or replacement thereof to the cunsomer
Upon request from MIRC ELECTRONICS LTD or its authorized service center, the consumer must provide the purchase receipt or other documentation or information in respect of the date and place of purchase.
The consumer shall have no coverage or benefits under this warranty in the event that any of the following conditions are applicable.
The Product has been subject to abnormal use or conditions, improper storage, exposure to excessive moisture or dampness, exposure to excessive moisture or dampness, exposure to excessive temperatures, unauthorized modifications, unauthorized repair including but not limited to use of unauthorized spare parts in repairs abuse, accident, Acts of God, spills of food or liquids, maladjustment of customer control and breakage or damage to antenna.

MIRC ELECTRONICS LTD has not been notified by the consumer of the defect in the product during the applicable warranty period.
The product serial number or the accessory date code has been removed, defaced or altered.
The defect or damage caused by defective function of the cellular system or by inadequate signal reception by the external antenna.
The product has been used with or connected to an accessory not supplied by MIRC ELECTRONIC LTD , not fit for use with ONIDA mobile phones or used in other than its intended use.
The seals of the product's battery enclosure have been broken or show evidence of tampering or the product's battery has been used in equipment other that for which is has been specified. In order to derive the benefits of this warranty, the consumer should follow the following procedure.
The consumer shall return the product to place of purchase for repair or replacement.
The consumer may contact local MIRC ELECTRONICS LTD office for the nearest authorized service center.
The consumer shall arrange for the product to be delivered to the authorized service center.
The consumer will be billed for any parts or labour chargers not covered by this warranty. The consumer shall be responsible for expenses related to reinstallation of the product.
